

Pathway to Detail and Fabrication

Required Coursework:

Required Design Studio

ARCH 571 Design: Detail and Architectonics
(Two @ 6 hours = 12 hours)

Required Graduate Seminars

Arch 400+ - Arch Detail and Fab Seminar
(9 hours)

Elective courses on Detail and Fabrication topics totaling at least 9 credit hours (generally three courses @ 3 hours each). Please reach out to the Program Chair or the graduate advisor for program offerings.

Faculty in other Program Areas may, on occasion, offer 400- or 500-level courses that are appropriate for the Detail and Fabrication Pathway. Courses offered in other departments of the University, such as Art and Design and Engineering, may also address topics in Detail and Fabrication.

With prior approval, students may fulfill up to 3 credit hours for the Pathway with such coursework. In such cases, the Chair of Detail and Fabrication, in consultation with the student's advisor, may approve the course for fulfillment of the Pathway. This can be completed by email.

Deadline for Registration

Students can declare a pathway in any of their first three full-time semesters in their M.Arch Program. No pathway will be approved if submitted in the student's last full-time semester in the program.

Adding a Pathway

Students wanting to declare a pathway as part of their M.Arch Program should fill out a petition using the following link.

[https://grad.illinois.edu/academic support](https://grad.illinois.edu/academic%20support)

Once a petition has been filled, students should schedule an advising appointment with the graduate advisor to discuss a plan of study. Then, the student will need to meet with the program area chair to receive final approval of the petition.
